Skills

Hands-On Experience & Projects

2025-Current

AIAC - AI Assistant Coach (Final Project)

Engineered an automated **analysis pipeline** to process massive event-stream datasets across 4,900+ instances. Applied statistical modeling **using Python** to generate deep analysis **reports** and **validate** complex system behaviors in real-time. [more info](#) [view project](#).

2025-10 –
2025-06

Tech News Assistant

Developed a robust automated system integrating 12+ complex data sources into **PostgreSQL**. Implemented rigorous **data validation** checks and automated reporting dashboards to ensure **high-scale data integrity** and **monitor** system progress. [more info](#) [view project](#)

2025-08-
2026-03

FPL Assistant

Developed an automated deep-dive analysis system **using Python** (NumPy/Pandas) for **real-time** trend identification. Cross-referenced large datasets to identify potential issues and provide strategic mitigation recommendations. [more info](#) [view project](#)

Education

2021-2026

B.A: Comp. Science
-Multidisciplinary College,
Jerusalem
